# ASSP LearnEx Online Courses

LearnEx courses allow for the same level of skill-building and engagement you expect in face-to-face training, without having to travel to a formal classroom. Take advantage of online interactive video lectures, virtual discussions, interactive games and scenario-based/real-world assessments to advance your understanding of safety and drive results at your organization.

## Prevention through Design

3 weeks | 1.0 CEUs | Z590.3 Standard included with registration

In this 3-week online course, you will explore the topic of PtD through interactive video lectures, course discussions, interactive games, and scenario-based/real-world assessments. Designed around the Z590.3 standard, this course includes three modules focused on hazard identification, risk assessment and practical applications and case studies. The course finishes with a practical project where you provide an example from your workplace.

## Essential Risk Assessment Tools for OSH Professionals

4 weeks | 1.4 CEUs

This course provides learners with the foundational understanding of essential risk assessment tools. Through four learning modules, your instructor will teach you how to utilize tools for hazard identification, modify risk assessment tools and apply risk assessment reduction concepts.

## ISO 45001

4 weeks | 2.1 CEUs | ISO 45001 Standard included with registration

With the approval of the ISO 45001 standard, it's more important than ever to prepare yourself and your organization for its implementation. This LearnEx course will provide learners with an introduction to the standard through six different modules, and will contain exercises, examples and discussion board questions.
